

Montessori Revolution? *What's that?*

As the Beatles' lyrics called us to a different way of viewing the world and our ability to change society, our Montessori Revolution calls us to a better method of educating the child.

In her time (1870-1954), Maria Montessori was as much of a revolutionary as the leading thinkers of the 1960's and 1970's.

*We all want to
change the world*

Montessori Revolution is a transformation and validation of an educational methodology that teaches, inspires, and guides children to become responsible citizens and allows them to reach their fullest potential. It's time to pay attention. It's time to support education that has positive effects on children and on society.

*What we put in,
we get back!*

*Our annual auction
provides funds for
discretionary expenses outside
of our operating budget.*

These expenses include:

- **Financial Assistance**
Annually MVM awards over \$100,000 in financial assistance to 20% of our enrolled families allowing for healthy economic diversity in our school community.

Mountain View Montessori

Who we are...

For 41 years, Mountain View Montessori School (formerly Trinity Montessori) has been dedicated to educating students in our Reno-Sparks community. Our students are ages 3-14, primary through 8th grade.

What we do...

How, why, and what children learn is a concern that touches all of us at different levels. As parents we want the best learning environments for our children; as business leaders we hope for the best as we look toward hiring future employees; and as community citizens we hope for accountable, responsible, and industrious individuals who contribute to our society's well-being and future.

It has been proven that high quality, student centered, project based educational programs provide enduring positive results. By introducing children to complex concepts and topics while using multi-sensory materials with the freedom to repeat, children in Montessori environments are able to build strong literary and math skills.

Pioneers in the digital world, including Google co-founders Sergei Brin and Larry Page, Jeff Bezos of Amazon, Jimmy Wales of Wikipedia, and Will Wright of Sim City gaming fame, have directly credited the exposure they received in Montessori classrooms to creative problem-solving as the basis for their later success.

Please consider supporting Montessori education, our children and their future by participating in this annual event.

How can you support Montessori education?

Opportunities for families, friends, and community patrons to participate

Attend the event

Mark your calendar and join us

**Saturday,
February 11, 2012**

Individual tickets \$125
